

Memory Support

at Passavant Community

Montessori for Dementia and Aging is our person-centered approach to memory care.

This way of living combines Dr. Maria Montessori's philosophy of learning and living with what we already know about aging and dementia so those we serve can experience an **Abundant Life**®.

Our goal is to enable your family member to be as independent as possible, engaged in a meaningful life, doing things they love, with people they enjoy, in a supportive environment.

Each day, activities and roles are available that match a person's existing abilities so that your loved one can engage in purposeful activities, make valuable contributions to the community and live a meaningful life.
